HELP!
CLICK HERE!

This is the Sponsor setup area, where you can create your company's ECommerce website quickly and easily. Simply follow the step-by-step instructions; we've included sample text to show you what kind of information to provide.

Access to the Setup Area is restricted by company code and password to authorized representatives of your company. Providing accurate information is important, so please edit your website as often as you like. **To edit your information, point your browser as often as you like to <http://www.provider.com/mysite/> and enter your company code and password.**

Each section below represents a different page of your website. Simply click on the edit button for each page, review the sample text we've provided, fill out the form with information about **your** business, and then preview your new page by clicking on the preview button.

The page preview allows you to look over the final content of the pages you have created. Once you are happy with your work, you can view your actual working website by pointing your web browser to <http://www.provider.com/es/exports>. **Please save this internet address to see your website on the Internet.**

First time visitors must start with “General Information” and complete all sections. Instructions are available to guide you . This entire process should take about one hour. After completing set up, updating your information will take much less time. Use the navigation bars on the left side of each page to save time.

Figure 1 consists of 12 histograms arranged in a 6x2 grid, showing the distribution of the number of non-zero elements in the rows of the matrix A_k for $k = 0, 1, \dots, 11$. The x-axis for all plots is 'Number of non-zero elements' ranging from 0 to 10. The y-axis is 'Frequency' ranging from 0 to 10. The distributions are roughly bell-shaped and centered around 5-6 non-zero elements.

Figure 1 consists of 12 subplots, each representing a different value of k from 0 to 11. Each subplot is a histogram showing the frequency of the number of non-zero elements in the rows of the matrix A_k . The x-axis for all plots is labeled 'Number of non-zero elements' and ranges from 0 to 100. The y-axis is labeled 'Frequency' and ranges from 0 to 10. The distributions are roughly bell-shaped and centered around 50-60 non-zero elements. The plots are arranged in a single column, with $k=0$ at the top and $k=11$ at the bottom.
